

THE REAL IMPACT OF INVENTORY VISIBILITY ON YOUR LOGISTICS

How just one data silo can lead an entire supply chain into chaos

If you want to keep a pulse on everything happening in your warehouse or factory, you need complete – and completely accurate (data) – visibility.

79 percent of enterprises are concerned about the continued lack of supply chain visibility due to manually-driven processes.*

System silos

Missing data

Inaccurate data inputs

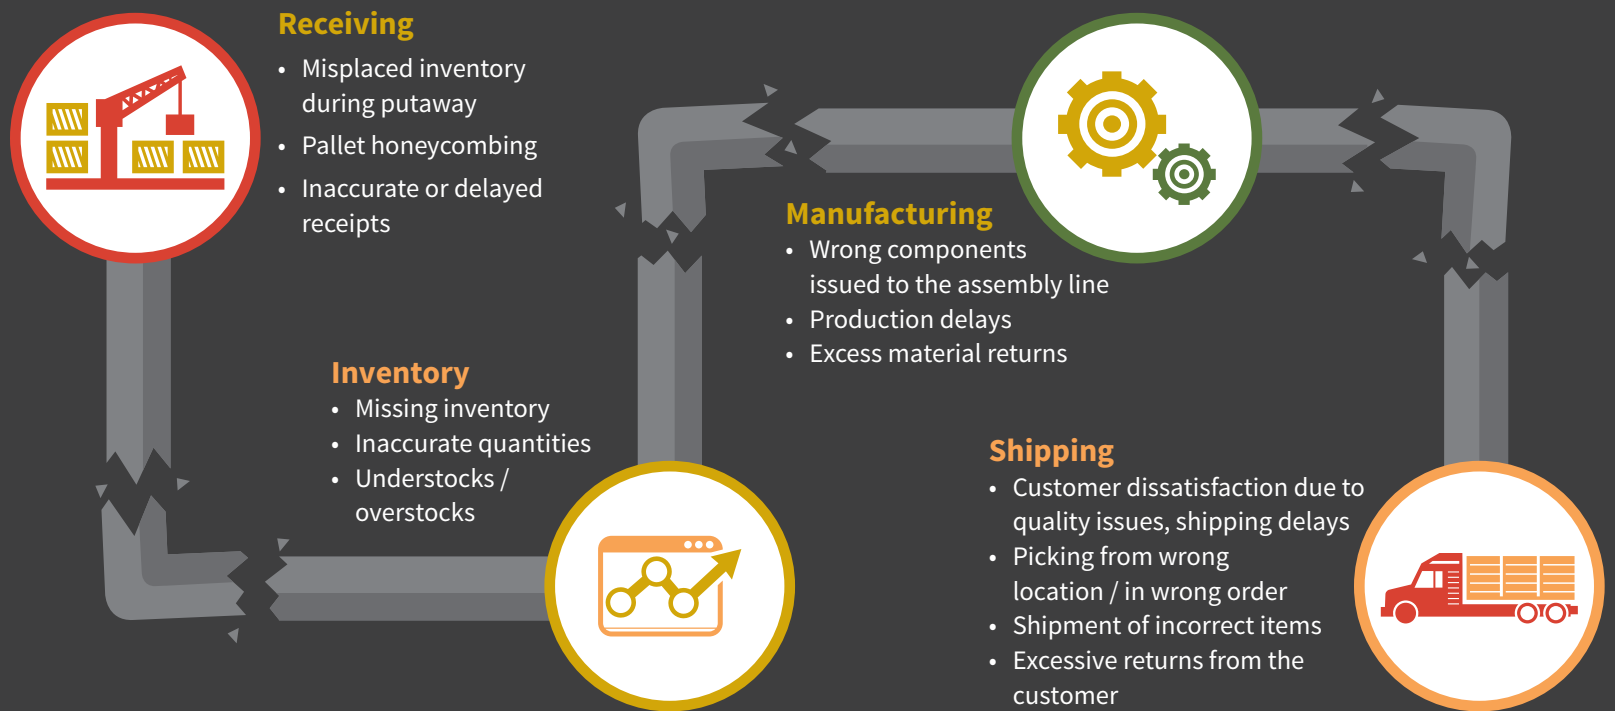

Duplicate data sets

Lack of data validation with ERP

A BROKEN DATA OR COMMUNICATION CHANNEL, FOR ANY REASON, WILL LEAD TO A BREAKDOWN IN SUPPLY CHAIN PROCESSES.

WHEN YOU LOSE SIGHT OF YOUR INVENTORY, IT BECOMES EASY TO LOSE CONTROL OF OTHER LOGISTICAL PROCESSES.

IT ALSO BECOMES EASY TO LOSE CONTROL OF OPERATIONAL COSTS, INCLUDING THOSE DIRECTLY INFLUENCED BY INVENTORY LEVELS AND MOVEMENT.

Cost of Labor

Lost Materials

Missed Deadlines

Misused Space

Excess Inventory

WHAT DO YOU NEED TO FIX THESE PROBLEMS?

A mobile-enabled data management solution that provides:

- 1 Real-time integration with your ERP
- 2 Error prevention
- 3 Accurate data capture
- 4 Inventory management and tracking
- 5 Lot traceability
- 6 Guided picking and putaway
- 7 Improved transactional efficiency across warehouse operations

Learn how to gain a new level of visibility, mobility & agility in your warehouse and manufacturing operations.
